AQUAPURE

Smart Genuine Facial Care System

Uniform Spray Control Technology

The complication-free designed spray control knob gives users the tools to effectively deliver equal distribution at 10 different flow levels to opt from. Addressing this common occurrence in this type of technology minimizes treatment efficiency and results.

Control
Technology

• AQUAPEEL

Three different types of optimized solutions supply nourishing properties to the skin, dissolving impurities and helping consumers to achieve a healthier reflection.

• ELECTROPORATION

Enhances transdermal delivery of positive ingredients deep within the skin by providing an effective and direct route to the inner layers of the skin.

• MICRO-CURRENT

Muscle stimulation by micro-current therapy helps to achieve elastin and collagen regeneration to establish a lifting effect by directing low electrical currents to the skin and facial muscles.

• COOLING / HEATING

Applying cooling at -5°C or moderate heating techniques post treatment is a complementary finishing step which actively relieves the skin of hyper sensitivity by influencing and stimulating blood circulation.

Optimized User-Focused Technology

To address a multitude of skin concerns

▣ User Focused Smart Auto Reaction

Exclusively developed for optimal convenience, the Smart Auto-Reaction Interface detects and prompts the necessary interface for each hand-piece automatically.

▣ Subtle & Stable Electroporation Process

The precision and control of the output of electroporation comfortably delivers energy by penetrating the skin without any irritations occurring.

▣ Cost Efficient Treatment

Consumable solutions are distributed equally and efficiently, ensuring reliable and long-lasting use of the solution product.

▣ Proven Cosmetic Solution

A combination of natural extracts, Hyaluronic Acid, and a complex of Peptides complement the patented technology, to provide the highest grade of laboriously selected and nutritious ingredients to consumers.

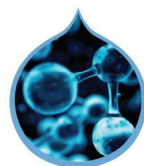

Seaweed Complex

Propolis Extract

Centella Asiatica TECA

Peptide Complex

▣ AQUASOLUTION Range

PEEL+

The first step of treatment is the process of non-irritating skin scaling which facilitates to accelerated exfoliation, the removal of impurities and dead skin cells.

SEBO+

The second step of treatment is for sebum dissolution, treatment of blackheads, and effective pore control. This assists the skin to balance between oily and moisture textures.

REJUVE+

The final step of treatment promotes skin elasticity by inducing collagen and elastin regeneration and improving the inhibition of moisture loss by improving water retention.

CLEANSYS

To provide a convenient cleaning agent specifically made for the needs of the system, Cleansys assists in easy maintenance procedures for the AQUAPURE.

MULTI FUNCTIONAL HAND-PIECES

AQUAPEEL	Skin Exfoliation & Moisture
ELECTROPORATION	Transdermal Delivery
MICRO-CURRENT	Facial Lifting
COOLING	Skin Relaxation

SYSTEM SPECIFICATIONS

Input Voltage	100-240V~, 50/60Hz
Applicator	Aquapeel / Electroporation / Y Lifting / Cryo
Panel	Touch panel
Dimension	360 x 550 x 330mm (WxDxH)
Weight	13kg

CE

AQUAPURE functions include:

- Skin Rejuvenation
- Exfoliation & Extraction
- Deep Pore Cleansing
- Skin Elasticity
